Pencil

PASO 3 / STEP 3

COLOCACIÓN DEL CABECERO / HEADBOARD INSTALLATION

Las DELTAS vienen instaladas y fijadas de fábrica en la parte trasera del cabecero. Una vez fijadas las COPLAS a la pared, solo es necesario enganchar el cabecero a ellas.

The DELTA brackets are pre-installed and factory-fixed to the back of the headboard. Once the COPLA brackets have been fixed to the wall, simply hook the headboard onto them.

PASO 3.1 / STEP 3.1

ALINEAR / ALIGN

Levanta el cabecero y alinea las DELTAS, ya fijadas de fábrica, con las COPLAS instaladas previamente en la pared.

Lift the headboard and align the factory-installed DELTA brackets with the COPLA brackets previously fixed to the wall.

ENGANCHAR / JOINT

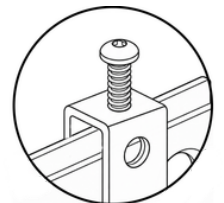

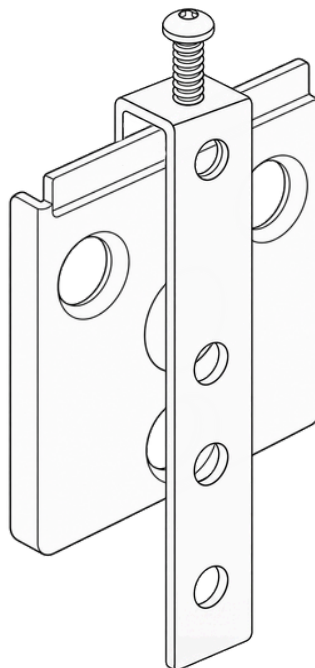

Introduce la parte superior de cada DELTA en la COPLA correspondiente.

Insert the upper part of each DELTA into the corresponding COPLA.

ASENTAR / SEAT

Desliza el cabecero suavemente hacia abajo hasta que las DELTAS queden completamente asentadas en las COPLAS.

Gently slide the headboard down until the DELTA brackets are fully seated in the COPLA brackets.

AJUSTE DE ALTURA / HEIGHT ADJUSTMENT

El tornillo superior de cada DELTA permite ajustar la altura del cabecero. Este tornillo se utiliza únicamente para el ajuste y no se fija a la COPLA.

The upper screw on each DELTA allows the height of the headboard to be adjusted. This screw is only used for height adjustment and does not attach to the COPLA.
